

## NECKLACE SIZE

When choosing a necklace, it can sometimes be difficult to choose the right length to go with your outfit. Fortunately, a standard chain length of 40cm to 45cm has been set as a universal guide – this sits just between the base of the throat and the collarbone, for most people. And, just like any style, the correct length for you is based on personal taste. We recommend to have different sizes and styles of necklaces on hand for different occasions.
